Subchapter 4. Ownership and Breeding of Wolves and Wolf-Dog Hybrids.

§ 20-19-401. Purpose of regulations

The General Assembly finds that:

- (1) Wolves and wolf-dog hybrids are now present in this state but remain unregulated;
- (2) The Compendium of Animal Rabies Control advises that no vaccination has been approved for use in wolves or wolf-dog hybrids;
- (3) However, wolves and dogs are scientifically classified as the same species;
- (4) “Off” and “Extra” label use of vaccines approved for use in dogs are widely used to vaccinate wolves and wolf-dog hybrids, even by the federal government, to prevent diseases such as rabies;
- (5) Failure to vaccinate wolves and wolf-dog hybrids raises the possibility of creating a large pool of animals that could serve as reservoirs for rabies; and
- (6) Due to the neglect and irresponsibility of their owners, some wolves and wolf-dog hybrids could pose a threat to public safety in this state.

 - (ii) An outer fence eight feet (8') high with at least four feet (4') between the two (2) fences unless the inner fence is an electric fence posted with warning signs and the gate is locked at all times;
 - (B) For a pair, double the cage length for a single animal; or
 - (C) For more than two (2) animals, add ten feet (10') to the single animal length and width for each additional animal;
 - (2) A secluded den four feet (4') square for each animal; and

(d)(1) Adequate feeding shall include daily feedings and provisions of water.

(2) The feed used shall consist of a minimum meat-based protein content of twenty-five percent (25%) and crude fat of fifteen percent (15%), with exceptions for geriatric and overweight animals or under the advice of a licensed veterinarian.

(e) Owners and custodians of wolves and wolf-dog hybrids shall allow inspections by law enforcement personnel at reasonable hours to ensure adequate confinement and adequate feeding.

(f) This section applies only to owners of four (4) or more adult wolf-dog hybrids or wolves, animals one (1) year of age or older.

§ 20-19-405. Entry into the state

(b) No animals from rabies-quarantined areas shall be admitted into this state.

(b) Veterinarians shall inform the owner of the wolf or wolf-dog hybrid, preferably in writing, that the vaccination is considered "off label" and that protection against rabies is not guaranteed.

(c) If a wolf or wolf-dog hybrid bites a person, the following criteria shall be used by an official of the Division of Health of the Department of Health and Human Services in dealing with the animal:

(1) The decision shall consider, at least:

(A) The epidemiology and risk of rabies in the species of animal in question;

(B) Possible prior exposure to a rabies vector;

(C) Behavior of the animal at the time of the bite;

(D) Prior rabies vaccinations; and

(E) Other circumstances that may exist;

(2) In some situations, the division shall consider the initiative and willingness of the individual so exposed to submit to postexposure antirabies immunization after being adequately informed of all potential risks;

(3) Upon written order by the Director of the Division of Health of the Department of Health and Human Services or a specifically designated representative, any biting animal determined to be at significant risk for the transmission of rabies shall be humanely killed and the brain tissue submitted for testing; and

(4) The division has the authority to order the quarantine of an animal determined to be a very low risk for the transmission of rabies for a thirty-day observation period as an alternate method to euthanasia and testing.

(d) Owners shall be notified and given three (3) business days to provide proof to the division in their animal's defense before the animal can be euthanized.

(e) If in the future the United States Department of Agriculture approves the use of rabies vaccines in wolves or wolf-dog hybrids, or both, then wolves and wolf-dog hybrids will fall under the same regulations as dogs regarding biting humans and rabies control.
