

§ 21.29. Sanitation.

(a) Excreta shall be removed from the primary enclosure, including any floor area or ground surface beneath the primary enclosure, on a daily basis.

(b) Primary enclosures for dogs shall be sanitized a minimum of once daily, and as often as is necessary to prevent an accumulation of debris or excreta or a disease hazard. A dog may not be placed in a primary enclosure previously occupied unless the enclosure has been sanitized.

(c) The buildings and grounds of kennels shall be maintained, kept clean and in good repair to protect the animal from injury and to facilitate practices required by this chapter. Kennels shall have an effective program that controls ingress by insects, ectoparasites and avian and mammalian pests. Evidence of insects, ectoparasites and avian and mammalian pests or conditions that would allow or encourage infestation in a kennel are indicative of an ineffective program and unsanitary environmental sanitation in the kennel.
