

## Error Summary

### HTTP Error 404.11 - Not Found

The request filtering module is configured to deny a request that contains a double escape sequence.

## Detailed Error Information

Module	<b>RequestFilteringModule</b>	Requested URL	<b>http://www.legis.state.wv.us:80/legisdocs/code/17/W%20%203%20%20-%20%20%20%206%20A.htm</b>
Notification	<b>BeginRequest</b>	Physical Path	<b>\\WWWDATA\legisdocs\code\17\WVC%2017%20%20%20%203%20%20-%20%20%20%206%20A.htm</b>
Handler	<b>StaticFile</b>	Logon Method	<b>Not yet determined</b>
Error Code	<b>0x00000000</b>	Logon User	<b>Not yet determined</b>

## Most likely causes:

- The request contained a double escape sequence and request filtering is configured on the Web server to deny double escape sequences.

## Things you can try:

- Verify the configuration/system.webServer/security/requestFiltering@allowDoubleEscaping setting in the applicationhost.config or web.config file.

## Links and More Information

This is a security feature. Do not change this feature unless the scope of the change is fully understood. You should take a network trace before changing this value to confirm that the request is not malicious. If double escape sequences are allowed by the server, modify the configuration/system.webServer/security/requestFiltering@allowDoubleEscaping setting. This could be caused by a malformed URL sent to the server by a malicious user.
