| | | | |
|--------------|-------------------------------|---------------|---|
| Module | RequestFilteringModule | Requested URL | http://www.legis.state.wv.us:80/legisdocs/code/07/W%20%201%20%20-%20%20%20%205%20%20.htm |
| Notification | BeginRequest | Physical Path | \\WWWDATA\legisdocs\code\07\WVC%20%207%20%20%201%20%20-%20%20%20%205%20%20.htm |
| Handler | StaticFile | Logon Method | Not yet determined |
| Error Code | 0x00000000 | Logon User | Not yet determined |

Most likely causes:

- The request contained a double escape sequence and request filtering is configured on the Web server to deny double escape sequences.

Things you can try:

- Verify the configuration/system.webServer/security/requestFiltering@allowDoubleEscaping setting in the applicationhost.config or web.config file.

Links and More Information

This is a security feature. Do not change this feature unless the scope of the change is fully understood. You should take a network trace before changing this value to confirm that the request is not malicious. If double escape sequences are allowed by the server, modify the configuration/system.webServer/security/requestFiltering@allowDoubleEscaping setting. This could be caused by a malformed URL sent to the server by a malicious user.
